

Ingersoll . Born and built in North America.

Ingersoll Tillage began in Sandoval, Illinois in 1884 as the Coulter Disk Company.

Today, Ingersoll serves both domestic and international markets from its North American base. The company provides innovative products created with technological advances, proprietary steel formulations and superior manufacturing processes. The Ingersoll product line provides soil management options for any tillage, planting and seeding practice.

Made in North America

Whether you operate domestically, internationally — or both, Ingersoll can add significant success to your business with high quality, long lasting soil management products. Give us a call. Let's have a conversation.
