

# SOILRAZOR™

Innovator • Global leader • Industry standard  
for residue management and vertical tillage

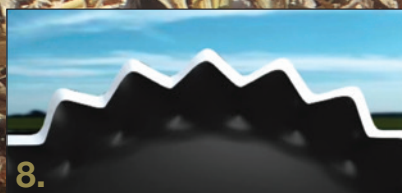

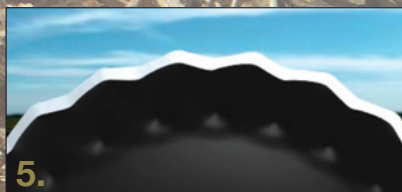

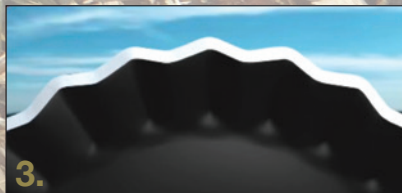

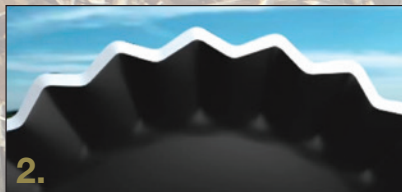

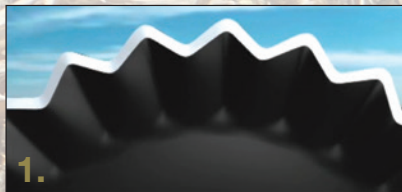

We make your  
conservation  
tillage, planting  
and seeding  
equipment better!

Ingersoll SoilRazor disc blades have pioneered an innovation in vertical tillage that has been rapidly adopted as the leading standard for worldwide applications. They deliver a valuable benefit by being designed to maintain their edge as they perform, slicing and mixing tough residue. Their sharp edge and unique sawtooth design allows them to penetrate difficult soil conditions and save fuel.

#### The Ingersoll difference:

Along with their unique design, SoilRazor blades are made from proprietary prime steel giving them long lasting performance, durability and resilience. Ingersoll's heat treating expertise and exclusive manufacturing processes produce special properties and consistently high product quality.

**Choose Ingersoll products  
for better results with residue  
management and seed bed  
preparation.**
