Visit Ingersoll at 2017 AgriTechnica Exhibition

NEW CATALOG TO BE AVAILABLE

Ingersoll Tillage Group will be available for customer interface at AgriTechnica, November 12-18, 2017 in Hanover, Germany. Industry personnel will be able to see and receive information about the latest technology, innovations and product developments provided to the marketplace by Ingersoll Tillage Group. The company has just completed production of an all-new catalog displaying the tillage, planting and seeding product offerings currently available. Attendees will be able to pick up a copy “fresh off the press.”

Ingersoll’s presence can be found in Building 11, Exhibit A-11. Company officials hosting the exhibit extend a welcome to all to stop by for a visit during the show.

Ingersoll Tillage Group has a successful history of developing some of the most advanced tillage products in the world. Ingersoll’s PURE professional grade steel is made from virgin iron ore taconite, and created with a proprietary formula. These unique properties provide long-lasting performance, durability and resilience. This unique steel, along with the company’s advanced manufacturing techniques, results in products unmatched for hardness and sharpness.
